

All About *Nature*
BUNDLE

Hello from your authors!

Yuliya blogs at Welcome to Mommyhood, where she shares life as a mother, and raising children in a Montessori inspired home. She writes about learning activities and printables for parents and teachers, tips and resources for setting up a Montessori home, and life from a wheelchair.

Katherine is a Montessori teacher from Ukraine. She creates different printable learning materials that can be used in the classroom and at home. She blogs at I Believe in Montessori where she shares her Montessori ideas and tries to inspire teachers and parents.

Terms of Use

Feel free to

1. Use the product in the bundle in your classroom and home

2. Make enough copies to use in your own classroom and family

3. Save this file to your personal or school computer

4. Direct others who may want to use these resources to the bundle page or our stores

Please don't

1. Share the files in the bundle with your friends, team, school, homeschoolers

2. Copy or distribute these products for other teachers or for the classroom other than yours

2. Benefit financially from these products or their parts

3. Post any parts of these products anywhere online (free or for sale) or on shared drives/clouds

How to use the bundle

We tried to organize the bundle in the way so it is easy for you to store, browse and use.

All the bundle is divided into 3 big folders:

- zoology materials*
- botany materials*
- various materials about nature*
- bonuses*

Every folder has the specific materials grouped together for your convenience.

What can help you to use the bundle?

- 1. Kindly use the table of contents that you will find in this file to look where the needed material is situated. You can also print it and put in a binder with your new materials.*
- 2. Please use the extended table of contents that you will find in this file to look at every material closer, read its description and know what it includes. Sometimes the material has a lot more inside than you can expect after reading the name on the list.*
- 3. Please print the table of contents for yourself. Put it somewhere where you store your printables. Make a note in the table every time you printed some cards from the bundle. This way you will know for sure what cards you have already printed and will never need to look through the big number of cards to make sure.*

Such checklist will also come in handy when you need some material for your classroom and you want to check quickly if you have such in the bundle. No more buying the materials you already have! :)

- 4. Every material includes tips and instructions for printing and presenting. Please read them. They are useful.*

- 5. Don't forget to look at the bonus section!
We prepared a lot of surprises for you!*
